SPECIFICATIONS

WHERE TO USE	Rooftops and other open areas, A.C. units, streetlights
TARGET BIRD	Gull, pigeon or larger
BIRD PRESSURE	Light - Medium
MATERIAL	Stainless Steel and Delrin Plastic
INSTALLATION	Delrin base is screwed to surface, glue-on bases available
INSTALLATION LEVEL	Easy
PATENTS	5,343,651 and 5,452,536

Used with a boat base, Daddi Long Legs can be removed while the boat is in use.

easy to install

The Delrin (plastic) base can be screwed into most surfaces and comes with a 1/4" adhesive neoprene gasket. A PVC base adapter is available for glue-on applications. When placed together in groups, overlap the tips 4 - 6 inches.

how it works

Thin, stainless steel rods rotate in the breeze and wave menacingly, interfering with birds' wings as they attempt to land.

removable

The center spindle can be easily separated from the base to access the area its protecting.

hard to see

The Daddi Long Legs is inconspicuous from short distances and practically invisible from afar. Its unobtrusive design allows for use in even high visibility areas like shopping/walking promenades and parking lots.

humane

The waving rods have plastic tips to prevent injury to birds or humans.

A sea of Daddi Long Legs are installed to keep birds off this metal roof.

mounting Daddi Long Legs

Boat Railing Mount

When birds consider your boat's railing a perfect perch, attach a Daddi Long Legs with our boat railing mount.

Boat Base: This Lexan adapter attaches to the Daddi Long Legs base. It attaches to your boat with a bungee cord or rope.

Sandbag Base: The weighted sandbag base can be used in areas where the standard boat base is not appropriate.

PVC Base: When drilling is not an option, Daddi Long Legs can be attached to the PVC glue-on base adapter
